## o Academic Courses

#### ▶ Korean Language 3-credit | Mandatory

Throughout the course, beginners will be able to read and write the Korean language and understand basic daily dialogue. Intermediates (or advanced students) will be able to better understand intermediate words and phrases, and expand their knowledge to academic context.

#### ▶ Asia Business 3-credit | Elective

The Asian Business course provides international students with a detailed overview of the economic, political, and social issues facing Korea and other Asian countries in the region. In particular the course details a range of topics such as an examination of: The Asia Economy, North East Asian Trade and FTAs, Korean Pop Culture and Business, Korea R&D Facilities, Cross-cultural Communication Skills, Sustainable Development Practices in Asia, New Management Initiatives, and Firm Strategies in Global Market Places.

#### ▶ World Englishes and Cross Cultural Communication 3-credit | Elective

- The basic properties of human language and the basics of English linguistics
- The socio-linguistic aspects of communication and cross-linguistic perspectives
- Verbal-nonverbal communication, gender-differences/regional differences and dialectology
- The diversity of Englishes, world Englishes, and history of English in a cultural aspects
- Media-oriented and flipped-learning based course design

#### ▶ Class in Engineering Area 3-credit | Elective

Engineering is essential in solving the major problem which we are facing globally, such as climate change, energy problems and preservation of the ecosystem. Also it is an important tool for carrying out the nation's economic or social development plan. This course aims to understand the complexities of society's based on technology and engineering. It is intended to help scientists meet various challenges that will confront them when they enter society. Also the course try to seek the role of engineering as a driving force for social and economic development globally.

#### ▶ Class in Bioscience Area 3-credit | Elective

The course will provide basic concepts of biotechnology used in the agricultural industries in Korea. Main objectives of this course are: 1. Enhancing the understanding of animal and plant biology through presentations on newly developed techniques such as animal cloning and transgenic plant production. 2. Providing students with experience in animal & crop production and control of pests & diseases, along with field trips to related industries and agricultural fields. 3. Introduction to Korean biotechnology production and bio-safety through classroom, laboratory and field trip experiences.
